Browse Lab Inc. Announces the Beta Release of HelpConsole 7

Browse Lab Inc. announces a major upgrade to their leading product HelpConsole.

QUALICUM BEACH, BRITISH COLUMBIA, CANADA, May 25, 2016 /EINPresswire.com/ -- Browse Lab Inc., specializing in the development of web-based enterprise help authoring and facilities management solutions, announces a major upgrade to their leading product HelpConsole.   Providing the unique ability to publish dynamic help systems that can be run directly on a company's web server, HelpConsole allows authors the ability to quickly add content from anywhere, on any device using a standard web-browser.

"HelpConsole 7 is a milestone in our development of a superior help authoring solution. We've rebuilt the software from the ground up to make this the best version to date," says James Dean, President of Browse Lab Inc. "We're confident that HelpConsole 7 equips our customers with the best help authoring tool available on the market today."
"We want our customers to take control to meet mobile demands and changing needs of user interactions with help systems," says Aaron Morin, Director of Support Services. "We continue to listen to feedback from customers and encourage communication to continually improve our products."

New and Improved in HelpConsole 7:

• Fully responsive and completely optimized for mobile users
• Built with Bootstrap 3 or [Full support for Bootstrap 3]
• Improved support for HTML5 and CSS3
• Dramatically improved menu based editor
• Edit the system logo, title, and more inline quickly
• Faster Page Loading Via AJAX Instead of iFrames
• Improved search suggestions and filtering
• Much faster searching of help system content
• Dramatically improved, fast and reliable PDF Publishing
• Formatted HTML and CSS Editors

• Improved multi-media embedding, audio, video and YouTube
• Improved, searchable user and security group management

About Browse Lab Inc.
