

Intratec Discloses Costs of SBR Production via Emulsion Process

New report details capital investment and operating costs of a Styrene Butadiene Rubber Plant

HOUSTON, TX, USA, June 2, 2016 /EINPresswire.com/ -- Intratec Solutions LLC, the leading source for chemical markets data and production cost reports, is pleased to announce a new report examining the costs of production of Styrene Butadiene Rubber (SBR).

The new report presents the economics of SBR production starting from butadiene and styrene. The analysis encompasses a plant located in the USA, employing a typical cold emulsion process for generating a non-oil extended, non-staining grade of emulsion SBR (similar to 1502). This detailed study presents plant construction cost, Styrene Butadiene Rubber production cost breakdown, and raw materials consumption figures. It may be extended with supplemental analyses, such as Production Unit Cost Breakdown per Pieces of Equipment and Process Flow Diagrams & Equipment List, among others.

The new study is now part of Intratec portfolio of more than 900 up-to-date, independent and cost-effective reports. Intratec studies can be purchased online at Intratec website, via credit cards.

The content of the new report can be checked at www.intratec.us/analysis/sbr-e11a

For other Intratec reports focused on the costs of production of Styrene Butadiene Rubber, via other manufacturing processes and/or different raw materials, visit www.intratec.us/analysis/styrene-butadiene-rubber-production-cost

About Intratec Solutions LLC

Intratec (www.intratec.us) is an independent research and leading advisory firm, recognized for excellence in the evaluation of chemical markets and the economics of industrial processes. Since 2002, the production cost reports and online databases we provide have boosted the early recognition of promising research and capital investment opportunities in the chemical, petrochemical, oil, plastic, renewable, alternative energy & allied sectors.
