

Intratec Discloses Costs of Ethylene Glycol Production from Ethylene

New report details capital investment and operating costs of a MEG Plant

HOUSTON, TX, USA, June 14, 2016 /EINPresswire.com/ -- Intratec Solutions LLC, the leading source for chemical markets data and production cost reports, is pleased to announce a new report examining the costs of production of Ethylene Glycol (Monoethylene Glycol – MEG).

The new report presents a techno-economic analysis of Monoethylene Glycol production from ethylene in the USA using a process similar to Shell OMEGA, in which no by-products are generated. This detailed study presents plant construction cost, Ethylene Glycol production cost breakdown, and raw materials consumption figures. It may be extended with supplemental analyses, such as Process Flow Diagrams & Equipment List and Utilities Consumption Breakdown, among others.

The new study is now part of Intratec portfolio of more than 900 up-to-date, independent and cost-effective reports. Intratec studies can be purchased online at Intratec website, via credit cards.

The content of the new report can be checked at www.intratec.us/analysis/meg-e12a

For other Intratec reports focused on the costs of production of Ethylene Glycol, via other manufacturing processes and/or different raw materials, visit www.intratec.us/analysis/ethylene-glycol-production-cost

About Intratec Solutions LLC

Intratec (<u>www.intratec.us</u>) is an independent research and leading advisory firm, recognized for excellence in the evaluation of chemical markets and the economics of industrial processes. Since 2002, the production cost reports and online databases we provide have boosted the early recognition of promising research and capital investment opportunities in the chemical, petrochemical, oil, plastic, renewable, alternative energy & allied sectors.
