PUNE, INDIA, May 30, 2016 /EINPresswire.com/  
-- About the [Radio Frequency Identification \(RFID\) Market](#)

An RFID system is based on wireless technology, which utilizes radio waves for gathering data from a tag attached to an object. It is used for different purposes such as for tracking objects and automatic identification. Components of RFID systems are mentioned below:

- Tag (used for the distinct identification of an object)
- Antenna (used to detect the tag; generates a magnetic field)
- Reader (used to receive tag information)
- Communication infrastructure (allows reader/RFID to work through IT infrastructure)
- Host

Technavio's analysts forecast the global radio frequency identification (RFID) market to grow at a CAGR of 11% during the period 2016-2020.

## Covered in this report

The report covers the present scenario and the growth prospects of the global radio frequency identification (RFID) market for 2016-2020. To calculate the market size, the report covers the revenue generated from end-user segments: industrial, financial services, logistics, retail, healthcare, and others (sports, airlines, consumer products, animals, and farming).

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Technavio's report, Global Radio Frequency Identification (RFID) Market 2016-2020, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

## Key vendors

- Datalogic

- Honeywell International
- Zebra Technologies
