Mark Systems Gives Back with Volunteer Day for Habitat for Humanity

Taking a break from building software to build a home, the Mark Systems team gained new skills, grew closer, and actively contributed to their community.

MOUNT HOLLY, NEW JERSEY, UNITED STATES, May 31, 2016 /EINPresswire.com/ -- Mark Systems continues its support of Habitat for Humanity, a non-profit organization that builds affordable ownership housing for families in need, by making a substantial monetary donation followed by an onsite volunteer day.

Ten employees from Mark Systems volunteered from the executive, consulting, and software engineering teams to assist in the new build. Together they worked to measure, cut, and nail into place the top plate on exterior walls; complete interior wall framing; apply sheathing to the entire exterior of the home; and cut out all window openings.

"The Mark Systems staff are all well experienced and bring building talents to our site that are not expected in a volunteers group. We got so much more done than we had planned for the day, and are in a great position to complete the home before schedule," said Mike Coslop, Habitat for Humanity of Burlington County, NJ, Site Supervisor.

About Habitat for Humanity of Burlington County, New Jersey

Habitat for Humanity Burlington County is an independent affiliate of Habitat for Humanity International. Habitat operates

through local affiliates so that all functions can have maximum relevance to individual communities.

Habitat for Humanity Burlington County serves thousands of people each year with the opportunities to volunteer and give back to their community, as well as hundreds of individuals, and families who now have a place to call home. Since our inception in 1987 we have built homes in Moorestown, Burlington City, Medford, Mt. Holly, Willingboro, Mt. Laurel, Beverly, Burlington Township, Florence, Bordentown, Palmyra, Mt. Holly, and Cinnaminson.

About Mark Systems

Mark Systems' IHMS is the industry's only single database home builder software suite.

No other home builder software offers the power, flexibility, ease of use, and return on investment of IHMS. The premier residential construction accounting software on the market today, IHMS combines a proven track record of performance with cutting edge technology to provide the performance control today's tough business climate demands.

Through the use of interactive maps, LotVue's apps, Lot Insight and Lot Buzz, allow developers and builders to easily visualize lot inventory, construction progress, sales status, budget and schedule variances, architectural and other vital information.

Mark Systems' single database architecture means that residential construction information is delivered instantly and transparently to every team member. Purchasing, scheduling, field operations, trade partners, sales office, and design center personnel all effortlessly share critical information.
