

# BOSS Controls Announces National Installation Partner

*BOSS Controls LLC, a leading Internet of Things energy management and controls company announces their partnership with Technical Consulting Group,(TCG) Inc.*

PITTSBURGH, PA, UNITED STATES,  
May 31, 2016 /EINPresswire.com/ --  
BOSS Controls LLC, a leading Internet of Things (“IoT”) energy management and

controls company today announced their partnership with Technical Consulting Group,(TCG) Inc. This partnership brings TCG’s national installation and project management services to BOSS customers, allowing for rapid deployment of BOSS Smart Plugs that leads to rapid energy savings for the customer.

“We work with the world’s leading technology companies, recognizing the synergies and opportunities that can be leveraged,” said Michael Dougherty, Partner, Technical Consulting Group. “We will deploy and install BOSS Control’s turn key energy management solution consisting of smart plugs and its Atmospheres software platform. We work with unique businesses that recognize IoT systems and we look forward to bringing BOSS Controls to market with our customers.”

“As we grow nationwide with commercial customers, it is important for us to have the best strategic partnerships,” said Greg Puschnigg, Founder/CEO, BOSS Controls. “TCG provides flexibility and deployment options that align well with our business.”

Managing and conserving energy at the plug level is the most underserved aspect of commercial IoT and energy management. Up to [30%] of energy lost in a commercial building occurs at the plug level. Using the BOSS system, building owners, property managers, sustainability managers and others can take full control of plug load energy waste, and rapidly generate measurable ROI for every device that is plugged into the wall.

## About BOSS Controls

BOSS Controls designs, markets, and sells patent pending, cloud-based, Wi-Fi enabled product solutions and software. The product suite provides a seamless fully integrated virtual energy management and control system enabling reductions in building energy costs by up to 30 percent and operational cost savings as well. The company manages the critical Wi-Fi hardware, software, and data on its cloud-based platform called “Atmospheres®.”

BOSS Controls, headquartered in Pittsburgh, is a member of Green Building Alliance and Independent Electrical Contractors. BOSS Controls Smart Plugs 120V and 220V can be ordered directly at <http://www.bosscontrols.com>.

## About Technical Consulting Group

Founded in 2002, Technical Consulting Group works with the world's leading communications, content, and high-tech companies, recognizing the synergies and opportunities that can be leveraged within and across all three industries. TCG has a portfolio of strategic partners known for providing the best, most imaginative equipment and services across the board. For more information, <http://www.tcongrp.com/>

The matters discussed herein may contain forward-looking statements that are subject to certain risks and uncertainties that could cause actual results to differ materially from expectations.
