

San Diego VNEM Solar Experts to Speak at July Solar Conference in California

VP of Home Energy Systems to Speak at 2016 Intersolar Conference

SAN DIEGO, CALIFORNIA, UNITED STATES, June 1, 2016 /EINPresswire.com/ -- Home Energy Systems (H.E.S. Solar) Vice President will speak at the upcoming 2016 [Intersolar](#) conference to take place in San Francisco July 11-13.th. Intersolar is one of the largest and most respected solar conferences in North America designed as an initiative to share and build awareness of solar energy, emerging solar technologies, and its many advantages as a viable renewable energy source. The solar phenomenon has caught up with businesses and consumers across the globe and as energy prices rise, solar power continues to advance in efficiency while decreasing in cost. Intersolar will represent the latest in the solar power industry featuring speakers on a variety of topics from professionals on the cutting edge of their respective specialties.

Ross Williams, VP of the 15 year old [San Diego solar](#) company, was invited to speak on Virtual Net Metering and NEM Aggregation at the renowned solar conference by the Center for Sustainable Energy, a non-profit organization that's mission is to help drive the adoption of clean, sustainable energy solutions. While Virtual Net Metering (VNEM) has been in play for several years, Home Energy Systems has proven themselves experts in commercial adoption of VNEM, implementing up to 500 apartments on these systems within San Diego County. Home Energy Systems is the only San Diego solar company

Dates of Intersolar 2016 And Speaking Engagement:

Date: July 11-13, 2016

Location:

InterContinental Hotel San Francisco
888 Howard Street

We've worked hard to become experts in this arena. I am excited to be part of the VNEM panel & help educate business owners on the huge savings potential and environmental impact.

Ross Williams, VP Home Energy Systems

- Ross Williams, Home Energy Systems

San Francisco, CA 94103
Conference Area - Levels 3-5

Speaking Place/Time:

Making Virtual Net Metering Work in California
Tuesday July 12 11:15 am - 12 pm | Level 5, Intercontinental B

Moderator: Brad Heavner, CalSEIA

Speakers:

- Erica McConnell, IREC
- Ben Airth, Center for Sustainable Energy

Virtual Net Metering solar systems provide an excellent return on investment for apartment owners. Instead of paying substantial amounts of money to private companies, it makes sense for apartment owners to make a one time investment in solar panels installation and save money in the long run. Traditionally VNEM installs have been more prolific in government subsidized multi-unit dwellings that provide solar power in low income housing. Still, the financials make sense for privately owned apartment homes as well. People looking for [solar for apartments](#) or similar commercial solar solutions in San Diego may consider contacting solar professionals at Home Energy Systems.

San Diego VNEM Solar Installations by Home Energy Systems:

- Aquatera Apartment Homes San Diego, CA
- The Marinella Apartments El Cajon, CA
- Solterra Eco Luxury Apartments San Diego, CA
- Quince Park Apartments Escondido, CA

Taking the right steps to save the environment from pollution and other harmful substances is the

responsibility of all citizens including homeowners and business owners alike. Environmentalists to politicians now are looking towards solar power to reach our now government mandated renewable energy goals of the future. The speakers at Intersolar 2016 will be imparting their expertise on how they are making it easier and easier to implement solar power into our daily lives.
