

# IT Governance's ISO27001 Certified ISMS Lead Auditor training course achieves accreditation with the IISP

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, June 7, 2016 /EINPresswire.com/ -- IT Governance, the leading provider of cyber security services and ISO 27001 expertise, is pleased to announce that its [ISO 27001 Certified ISMS Lead Auditor training course](#) has received accreditation from the Institute of Information Security Professionals (IISP).

Courses accredited by the IISP set the highest professional standards for accredited training schemes, and provide valuable training that enables members to develop skills to progress their careers.

Alan Calder, founder and chief executive chairman of IT Governance says: "Accreditation from the IISP demonstrates that our ISO 27001 Certified Lead Auditor training course materials and content have been assessed to ensure that they meet the IISP Skills Framework objectives and competency level. The framework defines the knowledge, skills and capability expected of security professionals in the practical implementation of information security."

IT Governance's ISO 27001 Certified ISMS Lead Auditor training course uses a combination of formal training, practical exercises and relevant case studies in a four-and-a-half-day course that effectively outlines the theory and practice of a successful ISO 27001 audit.

The ISO 27001 Certified ISMS Lead Auditor training course is designed to equip people who want to develop careers as qualified ISO 27001 lead auditor with the knowledge and qualifications required to conduct an ISO27001 audit.

The course is essential for all ISO 27001 lead auditors. Managers responsible for implementing and maintaining ISO 27001 compliance are required to have practical, working knowledge of the lead audit process.

Delegates will take an examination at the end of the course. Those who pass the exam will then be awarded the ISO27001 Certified ISMS Lead Auditor (CIS LA) qualification, issued by the International Board for IT Governance Qualifications (IBITGQ).

IT Governance's IBITGQ courses are accredited by The Global Association for Software Quality (Gasq) to ISO 27014, the international standard for information technology, security techniques and information security.
