

# San Diego Solar Company Powers Outdoor Summer Concerts with Solar Power

*Home Energy Systems sponsors community concert series in North Park, San Diego, Ca by providing solar energy to power the bands. Beginning Saturday, July 11*

SAN DIEGO, CALIFORNIA, UNITED STATES, June 7, 2016

[/EINPresswire.com/](http://EINPresswire.com/) -- Home Energy Systems (H.E.S. Solar) to provide solar energy for the 15th annual production of the North Park Community Association's (NPCA) [Summer Concerts](#) in the Park with a mobile [solar power](#) source. The NPCA puts together this community event at Bird Park in the community of North Park in San Diego, Ca. The concert series begins on Saturday, June 11 and another band plays every other Saturday evening into August 2016. The concerts take place in an outdoor venue and are free of charge and Music begins at 5:30PM.

The Bird Park Summer Concert Series, 5 concerts in all, brings an eclectic mix of musical styles from Jazz to Indie Rock and is enjoyed by locals and visitors to the popular urban area. For the last 13 years, the NPCA has used gas generators to power this event. That is where Home Energy Systems entered the production. H.E.S. been providing solar design and installation services to San Diego county since 2001. As one of the oldest and most experienced solar companies in San Diego, H.E.S. wanted to bring awareness to local communities on the benefits of renewable energy, energy conservation, and the value of supporting local businesses. This sponsorship effort was inspired by a combination of the desire to promote the use of clean energy through solar power and to highlight the local business effect. Namely, companies that operate and service a community give back to their community. "We could spend our communications budget knocking on doors and annoying you during dinner like "the other guys" but like San Diego, Home Energy Systems likes to keep it classy, from how we share our services to how we install top tier solar energy systems," says Ross Williams, VP of Home Energy Systems.

While H.E.S. reached out to several local organizations that host similar productions throughout San Diego County, the NPCA was one of the few who saw the vision and value of the sponsorship which equates to upwards of \$400.00 per concert. Home Energy Systems executives hold high interest in sponsoring more community events to support, solar power, summer fun and fostering community togetherness. Any community or non-profit organizations interested in solar energy support for their local San Diego event contact Lenora Lostaunau, Home Energy Systems Marketing and Communication Director.

About Home Energy Systems (H.E.S. Solar)

Home Energy Systems has been a [San Diego solar](#) energy design and installation company since 2001. H.E.S. provides clean energy through quality solar power systems for homes and businesses with attention to the financial sense it makes for each client.

We wanted to engage with the community on a local level to spread solar awareness. You need to be a little progressive to get it but, it's clear solar power saves on noise, emissions, and expenses.
