

Human Drugs For Veterinary Use - Current Trends and Future Commercial Prospects for Crossover Drugs

PUNE, MAHARASTRA, INDIA, June 8, 2016 /EINPresswire.com/ -- Access Report: https://www.wiseguyreports.com/reports/human-drugs-for-veterinary-use-current-for-crossover-drugs

Human Drugs For Veterinary Use - Current Trends and Future Commercial Prospects for Crossover Drugs

Summary

Human Drugs For Veterinary Use - Current Trends and Future Commercial Prospects for Crossover Drugs", discusses global commercial trends and prospects for human medicines applied in the veterinary setting, also called crossover drugs. A wide range of human drugs continue to be applied in the veterinary space due to a lack of approved animal therapies, convenience and the rising costs of veterinary research.

This new report provides insights into Extra-label Drug Use (ELDU), its application in the veterinary setting and other guidelines and regulations followed by professionals in the animal health industry. Through a series of in-depth case studies this report provides insights into the rationale for the transition of several human drugs to the veterinary setting as well as disease overviews, competing treatments, manufacturer information, dosage forms, cost of therapy and other insightful marketing information. Our new study also identifies and explores important drivers and restraints of the crossover drugs market.

Information leveraged from our robust industry-leading database shows a diverse range of marketed human drugs being used in companion animals especially cats, dogs and horses. Our new report includes detailed profiles of key animal health companies with diverse portfolios of crossover drugs as well as strategies being employed by competitors in this market to leverage human therapies into the veterinary space. Additionally, we identify emerging companies marketing various crossover drugs across a range of therapy areas.

GBI Research conducted extensive research in order to provide a comprehensive view of the current trends and commercial prospects for crossover drugs. This new report adds to our unique portfolio of trusted industry analyses that enable our clients to assess the most promising commercial areas in the market and exploit key business opportunities.
