

Reviewer says the Travelsafer Digital Tire Pressure Gauge is 'Worth It's Weight in Gold'

No need to struggle with awkward gas station tire gauges that often don't work.

LOS ANGELES, CALIFORNIA, USA, June 9, 2016 /EINPresswire.com/ -- The company Travelsafer are proud to release recent 5 star reviews of their [digital tire pressure gauge](#). 700+ satisfied customers have raved about how easy it is to use.

One of many satisfied customers has said, "My husband is a mechanic - which means he has all sorts of really expensive gadgets at his disposal and I feel a little left out when it comes to nice tools. This [digital tire gauge](#) makes me feel like I have something that is actually worth it's weight in gold. I really like that the batteries came with this gauge, unlike many I have seen in the store. The grip on this is really nice, with finger spacing and everything. The LED light up display makes reading the gauge easy, even at night or in the rain.

The gauge itself is not really heavy at all, but very sturdy feeling. I checked it's calibration next to one of my husband's expensive tools and it ran neck in neck with it. It is really easy to use and I did not have any issues getting it on the valve stem and reading the air pressure right away. It is very quick to give a reading, so I did not have to stay all bent down for very long which is really nice"

Another happy customer wrote, "This is an extremely easy to use digital tire pressure gauge by TravelSafer. My hubby is the one who has always taken care of everything that has anything to do with our vehicles and most of the time that includes putting gas in the car too. With that said, this is a first for both of us as far as having me do anything remotely related to car maintenance.

It was so easy for me to use this digital tire pressure gauge that I am sure anyone can successfully use it as well. I did not need my hubby's help but I did read over the instructions. There really was not much to the instructions so I was able to quickly read it and off I went to test out the pressure of my tires."

"A must have tool to carry in the glove box of your car, truck or SUV, and small enough to carry in a

Fits in One Hand

back pack on your bicycle or motor bike,” says James from Travelsafer. “No more struggling with awkward gas station gauges to get accurate tire pressure anywhere, anytime day or night.”

Easy push button start and automatic turn off to save battery life. Change between 4 ranges, PSI, Bar, Kpa and kg/cm2 with a further push of the button.
