

# LiveBlox changing the software landscape one block at a time

*Apulus unveils new software platform that can export multimedia applications without the need for any coding.*

SIEM REAP, SIEM REAP, CAMBODIA, June 10, 2016 /EINPresswire.com/ -- LiveBlox, by Apulus, is a tool that allows anyone to develop software applications without the need for any coding experience.

Rob Ewbank an English expat living in Siem Reap, Cambodia, has been developing LiveBlox since 2013 and with his business partner Nik Karlsborg (Norwegian) LiveBlox is almost ready to be taken to the global market.

Containing many different elements known as Blox, which are pre-coded, these blocks of code can simply be linked together by the user to create an application. Currently there are over 650 different Blox including audio, computer vision, video and many other creative tools.

"We are so close to launching LiveBlox and have created an [Indiegogo campaign](#) to help raise some funds for the final pieces of development and more importantly to provide some seed capital

to help launch LiveBlox to the world" Rob Ewbank

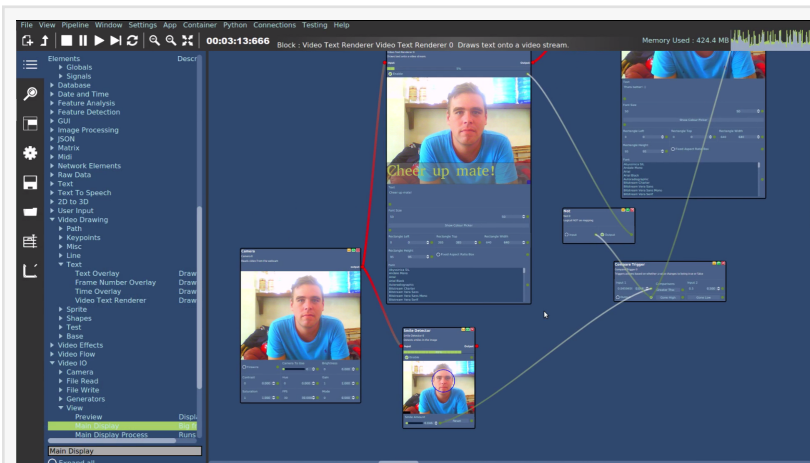

Indiegogo Campaign

Apulus, the company founded by Rob and Nik is a Hong Kong registered business with their development offices in Siem Reap and the guys have already struck up a great relationship with one of Cambodia's largest Universities, Build Bright University.

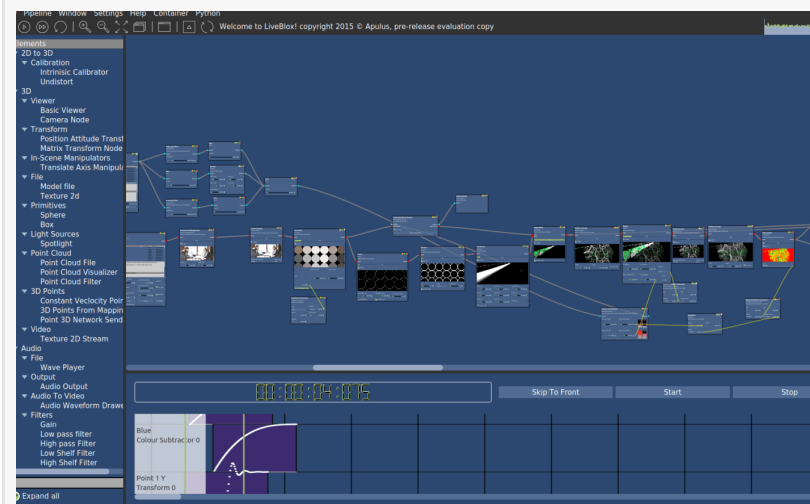

“

After using LiveBlox I found a world of possibilities had opened up to me. I never

students studying Computer Science at the University and are committed to helping advance

Small app in LiveBlox that writes cheer up when someone is not smiling

Shows some of the more complicated parts such as the timeline

Cambodia's young, exciting and dynamic IT Industry" Nik Karlsborg

Please visit the [LiveBlox website](http://liveblox.org) liveblox.org to see further information about this new and potential ground-breaking solution. Alternatively, you can download a demo of the solution by following this link
