

# Nexcopy Adds Standalone micro SD Duplicators

*Nexcopy Adds Standalone micro SD Duplicators With micro SD Card Sanitization Features*

LAKE FOREST, CA - CALIFORNIA, ORANGE COUNTY, June 22, 2016 /EINPresswire.com/ -- [Nexcopy](#) Inc., a leading manufacturer and developer of flash memory duplicators, introduces two new standalone microSD Duplicator models to Nexcopy's line of flash memory duplicators and sanitizers. The 1-15 and 1-31 target systems offer unparalleled copy speeds to Secure Digital media with additional functions for device sanitization.

The duplicators function primarily as binary copiers with a variety of built in features including:

- Bit by Bit Copying
- Benchmarking and Speed Test
- Pre-Scan Memory Features
- Speeds up to 1GB per minute
- Multiple Speed Copy Modes
- Control Equipment with Boot Password
- Set Language to: English, Spanish, Portuguese, Japanese

The Nexcopy microSD duplicators operate as stand-alone devices where a host computer is not required to perform the bit-by-bit duplication or the binary sanitization processes. The simple one-button operation of these advanced duplicators are ideal for IT departments, fulfillment houses, flash memory manufacturers, business, software developers and government agencies. For data professionals or businesses distributing data to employees or customers, a duplicator with this balance of speed and reliability can become an integral tool for daily activities.

Additionally, these new standalone microSD duplicators by Nexcopy can sanitize multiple devices simultaneously saving IT professionals valuable time in flash memory management. Core functions of these new systems include the binary copy process used in the popular Nexcopy [USB duplicators](#) systems. Binary copy modes include the ability to copy bootable microSD media, FAT, FAT32, NTFS, ext2, ext3, ext4 and any other file format system, proprietary or public.

“Pivoting from our core binary copy firmware, Nexcopy expands our technology to include sanitization features now being sought by IT professionals,” says Greg Morris, [Nexcopy Inc.](#) President. “It is

important for Nexcopy to listen to the requests of our customers and act upon them to bring the best product to market.”
