Google Earth, Global Positioning System (GPS), and Real time Kinematic are used to support the direction of tractors and other equipment, such as automatically open and close nozzles for spot spraying, and also register actions such as seeding rate, yield, moisture, fertilizer quantity, and time management of all the tasks. Slump in the agricultural production costs and increasing returns will lead end-users to invest more in agricultural production. Moreover, high returns allow farmers to invest in agricultural machinery for plowing and cultivation to maximize the output.

Soil Preparation and Cultivation Machine Industry market is segmented by product and by geography. Depending on the various products, market is classified into cultivators and weeders, disc harrows, hoes and scarifiers, fertilizer distributors, manure spreaders, ploughs and rollers. Based on geography, market is segregated into North America, Europe, Asia-Pacific and Rest of the World. Significant mergers and acquisitions, collaborations, and joint ventures are the industry trends that are playing a major role for the market growth.
