Asia-Pacific represents the fastest growing regional market for routers over the forecast period. Service Providers are the best budding end-user segment for routers. Cisco commands a high share across all 3 major router categories such as enterprise, core and edge routers. Cisco maintains a particularly substantial market share in the enterprise router category representing more than 70% market share. Although enterprise routers remain the single largest profit driver for Cisco, the service provider router segment (including both edge and core routers) generates a combined profitability beyond the individual contribution from the enterprise segment. The Global Routers Market is segmented on the basis of type, end user and Geography. On the basis of type, the market is categorized into broadband routers, wireless routers, core routers, edge routers, inter-provider border router, subscriber edge router and others. The market is segregated on the basis of end user into service providers, enterprises and others. Global routers market by geography is categorized into North America, Europe, Asia pacific and Rest of
