Gasifier technology is now evolving in a number of sectors such as oil refining and energy, municipal waste treatment, bulk power generation, and as a method of power generation in both grids connected and off- grid areas. The initial investment costs are also fairly low when compared to other sources of power generation such as wind and solar, which encourages investment in this market. At present Africa and Middle East are the major markets for gasifiers with the highest number of installations. The rising Asian economy favoring the new investments in this sector providing way for several upcoming projects, particularly China has emerged as the

most attractive investment destination. Growth in North America might slow down due to falling natural gas prices. Developing economies where rural electrification is still a problem can also prove to be a potential market of gasifier.

Global Gasifier Balance of Plant market is segmented by type, by construction, by application, by design and by Geography. Based on type market is further segmented entrained gasifier, moving/fixed bed and fluidized bed. Based on construction, market is categorized into pre-reactor, post-reactor and gasification. Based on application, market is classified into waste to energy, petcoke residuals, bio-mass to energy & liquid, plasma and coal to energy & liquid. Based on design it can be segmented as updraught, downdraught, fluidized bed, cross- draught, molten bed, entrained bed, and double fired. Market by geography is segmented into North America, Europe, Asia Pacific, and Rest of the World.
