

Asia-Pacific E cigarettes Market 2016 Share, Trend, Segmentation and Forecast to 2020

Wiseguyreports.com add report on "Asia-Pacific E cigarettes Market" to its research database.

PUNE, INDIA, June 20, 2016 /EINPresswire.com/ -- Around 95% of the total E-Cigarettes are made in one place called Shenzhen in China. Although in China the E-Cigarette market is growing slowly but, in other regions such as South Korea and Japan, the use of E-Cigarette is increasing. In 2014, According to WHO there are 466 brands producing E-cigarettes and in 2013 \$3 billion was spent on it globally. The sale of E-cigarettes is estimated to increase by a factor of 17 by 2030. E-Cigarettes or Electronic Nicotine Delivery System (ENDS) are tobacco free products which are being increasingly used by people to substitute for smoking or for recreational use. They are actually vaporizers that do not burn tobacco but heat up a liquid. The E-cigarettes are smoke free and even tobacco free but they do have liquid nicotine. The liquid inside the E-cigarettes contain liquid nicotine, flavoring agents, propylene glycol and some other additives.

The amount of nicotine is varies in different types of E-cigarettes with some having as much as a regular cigarette or there are some which have no nicotine. There is a battery which powers the device and whenever the user inhales and then the liquid is heated and is vaporized. Factors like Battery voltage and circuitry differences can cause variability in the E-cigarettes ability to heat up the solution and convert it to aerosol. This will affect the delivery of nicotine and other constituents to the user. Other factors such as depth of inhalation, length of puffs and frequency of use will affect the nicotine absorption by the user. Major companies have started investing in the market so there are more options for the users to

try. They are also cheaper compared to traditional cigarettes. The [e cigarettes](#) market report contains description on the various parameter defining this market such as the types of e cigarettes, battery type used, and the technology integrated into these very devices.

TABLE OF CONTENT

1. INTRODUCTION

1.1 Research Methodology

1.1.1 Definition of the Market

1.1.2 Report Description

1.1.3 Executive Summary

2. KEY FINDINGS OF THE STUDY

3. MARKET OVERVIEW

3.1 Market Segmentation

3.2 Overview

3.3 Industry Value Chain Analysis

3.4 Industry Attractiveness - Porter's 5 Force Analysis

4. MARKET DYNAMICS

- 4.1 Introduction
- 4.2 Drivers
 - 4.2.1 Increasing health concerns and cancer related cases
 - 4.2.2 Easy to procure
 - 4.2.3 Entry of big enterprises in this space
- 4.3 Restraints
 - 4.3.1 Some research studies consider them to be as harmful for passive smokers
 - 4.3.2 Lack of industry standards
 - 4.3.3 Some regions do not have a definite policy in place for these e-cigarettes
- 5. Technology Overview
 - 5.1 Technology Snapshot
- 6. Different Types of E-cigarettes by Products
 - 6.1 Completely disposable models
 - 6.2 Rechargeable but disposable cartomizers
 - 6.3 Personal vaporizers
 - 6.4 Others
- 7. Different Types of E-cigarettes by Battery Mode
 - 7.1 Automatic e-cigarettes
 - 7.2 Manual e-cigarettes
- 8. E-cigarette Global Market - Segmented By Region
 - 8.1 Asia Pacific
 - 8.1.1 China
 - 8.1.2 India
 - 8.1.3 Japan
 - 8.1.4 South Korea
 - 8.1.5 Others
 - 8.1.6 Analyst View
- 9. Vendor Market Share Analysis
