The songs could be used as meditation music, as they will put the listener into a relaxed state of consciousness. The accident that occurred four years ago caused Karen to have a near-death experience. After a long recovery, she began to hear music all of the time, and decided to record and play what she was experiencing. The result is a beautiful collection of piano music that is highly emotional, and yet still relaxing and enchanting. The accident has opened up a whole new world musically for the visual artist, who can now express herself visually as a sculptor, painter and photographer, but audibly also as a composer and pianist.
