PUNE, INDIA, June 21, 2016 /EINPresswire.com/ --

Resistance Temperature Detectors (RTD) are temperature sensors which contains a resistor that changes resistance value as the temperature changes. They have been used for many years to measure temperature in laboratory and industrial processes, and have developed a reputation for accuracy, repeatability, and stability. The growth of the RTD Temperature Sensors market is currently being hindered by maturity of critical end-user segment and dominance of legacy temperature sensor technologies. North America will remain as the market leader for RTD Temperature Sensors and Asia Pacific will grow with a strong CAGR of XX% during the period 2014 to 2020.

The RTD Temperature Sensors market is estimated at \$1.34 billion by 2018 at a CAGR of 6.66% over the period 2014-2020. The inclination of growth towards vehicle production, availability of a strong aftermarket, and rising trends of security and surveillance are the key drivers which are making the RTD temperature sensors market to grow lucratively.
