WISE GUY RESEARCH  
CONSULTANTS PVT LTD

Dental lasers are used for diagnosing dental disorders using laser therapy. It eliminates the need of surgical instruments such as dental drills, hand pieces, and dental anesthetics. Laser therapy in dentistry ensures less bleeding, less trauma, reduces contamination through instruments, and increase in comfort of the patient. The procedural time is reduced as most of the tedious processes are eliminated. The reduction in risks associated with dental surgical instruments and time for therapy creates new pathways for the use of dental lasers.

The global increase in the awareness level of oral hygiene, increasing aging population, increasing demand for cosmetic dentistry, prevalence of gingivitis, caries & periodontics, and rising disposable income in the developed nations such as the U.S. and Canada are factors responsible for the growth of the North American dental lasers market. However, high cost of surgery is a factor restraining the growth of the market. Technological advancements open new opportunities for the market.

The market is further classified based on end user into dental clinics, hospitals, and other end users. Geographically, the market is divided into U.S.A., Canada, and Mexico.

The prominent market players operating in the world are AMD Lasers, CAO Group Inc., Biolase Inc., Fotona D.D., Danaher Corporation- Kavo Dental GMBH, Convergent Dental, Ivoclar Vivadent AG, Sirona Dental Systems Inc., Syneron Dental Lasers -Syneron Medical Ltd., and Zolar Technology & Mfg Co. Inc. Various strategies, such as mergers & acquisitions, expansions, joint ventures, and others have been implemented by key manufacturers to gain stronghold of the market.
