

MixIT - Successfully Implemented In The Citrix Environment For A Pharmaceutical Giant

SAN ANTONIO, TX, UNITED STATES,
June 22, 2016 /EINPresswire.com/ --
Another great achievement by
Tridiagonal Solution's flagship product -
MixIT. MixIT has now been successfully
implemented in the citrix environment
for a major pharmaceutical company.

Citrix is a virtual computing environment that enables MixIT to be accessed by multiple users from a single software installation.

MixIT's standardized central environment can be accessed from anywhere via a desktop, mobile or a laptop. This accessibility helps users avoid tying up their own machine's compute resources, including, disk space, memory and processor backups. All of these are managed in the citrix environment.

MixIT, is a comprehensive, easy-to-use, enterprise analysis system designed to predict [stirred tank mixing performance](#) with the unique capability of automated [CFD analysis](#). It enables enterprises to design, compare, scale-up (lab to plant) and analyze the performance of multiple stirred tank reactors and bio-reactors using standard correlations and advanced CFD models.

With MixIT's new remote accessibility feature, we invite you to request a free evaluation to find out how its user-friendly virtualization can help you optimize your mixing systems.

About MixIT

About Tridiagonal Solutions Inc

Tridiagonal Solutions provides solutions to process engineering problems for a worldwide client base using computational fluid dynamics (CFD), experimental flow dynamics (EFD), discrete element Modeling (DEM) and chemical mixing simulation. Tridiagonal has extensive experience in the Chemical and Process, Oil and Gas, Consumer Goods, Food, Electronics, Power Generation

and Health-care Industries.
