

2016 Elos Touch Advance With 500,000 Pulses Is The Latest Hair Removal For Home Use Now Available

The 2016 Elos Touch Advance device has enough pulses for several years' worth of full-body hair removal.

CHICAGO, IL, USA, June 22, 2016 /EINPresswire.com/ -- The latest generation of at-home laser hair removal is now available from [Elos Me](http://www.elos-me.com/). The 2016 [Elos Touch Advance](http://www.elos-me.com/) with 500,000 pulses is the company's most powerful personal laser hair removal machine yet, allowing users to enjoy the same smooth, permanent effect as the laser hair removal in a professional clinic – at the comfort and privacy of their own home, and for a fraction of the cost.

The Elos Touch Advance:

- Contains 500,000 pulses.
- Comes with a free Precision Unit to control and target each pulse.
- Easy & simple to operate while providing professional salon-quality results.
- May be used on entire body: face, underarms, legs, chest, back and bikini line.
- Amazing results: a reduction of at least 89% in hair after just 6-7 weeks of treatments.
- Suitable for all skin tones and hair colors.
- Comes with a 2-year warranty and a 60-day money back satisfaction guarantee.

All of the Me-My-Elos at-home laser hair removal devices use the advanced RF+ IPL technology, which heats the hair shaft and follicle for a fraction of a second, effectively removing the hair and inhibiting regrowth.

Elos-Me is very excited to offer the newest generation of in-home laser hair removal to our customers. Professional hair removal clinics charge thousands of dollars for a full-body hair removal treatment, and hundreds for specific areas. The Elos Touch Advance pays for itself after just one use, and provides the same professional results you get in salons. (<http://www.elos-me.com/>).
