

Sureline Systems Announces Its Cloud Migrator Training and Certification Program

Sureline Systems' customer Frontier Networking benefits from New Training and Certification Program

SANTA CLARA, CALIFORNIA, US, June 23, 2016 /EINPresswire.com/ -- Sureline Systems, a leader in cloud [migration](#), datacenter consolidation, and [Disaster Recovery](#) solutions, is pleased to announce the training and certification program for the [SUREedge®](#) Migrator product. The training has three different levels allowing partners and customers to choose the level and schedules that align with their business needs.

Frontier Networking, a Sureline Systems partner, took advantage of the training program. Frontier Networking is a leader in Network Consulting, based in Walnut Creek California; it has over twenty years of network consulting experience. Frontier Networking provides small and medium-sized businesses throughout California with a full array of expert and reliable IT and network consulting services.

"The training provided a good overview and hands on session for the SUREedge® Migrator. I also realized that SUREedge has rich features and a very simple to use UI. I will be recommending it to my customers" said Gary Cooper, Consultant, Frontier Technologies, who recently completed the training.

The Basic training is ideal for customers to get a feel for the product and partners to train their pre-sales teams. The Advanced and Expert training is targeted at customers doing a significant migration project and for partners to train their services organizations.

Basic Training Certificate:

The Basic Training Certificate Program is a two day program and covers the Onboarding of physical and virtual servers to an on-premise platform and also migrating these servers to a Cloud platform. The entire workflow of "Discover->Capture->Transfer->Transform->Recover" will be covered and the features of creating plans and recovery sets is also included in this Program. The training will include a hands-on session for the participants to allow them to get a real feel of using the SUREedge Migrator themselves.

Advanced Training Certificate:

Advanced Training Certificate Program is a three day program and covers the Onboarding of physical and virtual servers to an on-premise platform and migrating these servers to a Cloud platform as covered in the two day program and will also include configuring a second Cloud. The training exposes the participant to the cool configuration features that SUREedge Migrator offers. This program includes hands-on sessions for the participants allowing them to explore SUREedge Migrator features themselves with added information on understanding error messages and resolving issues.

Expert Training Certificate:

Expert Training Certificate Program is a five day program and includes everything in the Advanced Training Program as well as information on the SUREedge architecture, understanding error messages, and how to resolve issues. This program will help the participant to understand the various monitoring, reporting and configuration features of SUREedge Migrator.

To sign up for this valuable program, please contact, trainings@surelinesystems.com.

About Sureline Systems

About Sureline Systems Sureline Systems is headquartered in Santa Clara, CA with offices in Japan, India, and Dubai. Sureline's award winning SUREedge® is a proven enterprise-class software solution for Cloud Migration, Cloud Disaster Recovery, Datacenter Consolidation and Application Mobility. SUREedge reduces risk through secure data transmission, efficient data movement, and reliable movement of the entire application, its data, and interdependencies. It is easy to deploy and manage through a single UI, with automated discovery, no agents to install, and is completely non-disruptive. SUREedge is source and destination agnostic working from any physical server, any hypervisor, any cloud, and any storage including hyperconverged to any destination. Customers worldwide trust SUREedge® to meet their workload migration, disaster recovery and business continuity and application mobility objectives.
