

New TexSilicon RFID Laundry Tag from Century Link Safeguards Textile Assets

TexSilicon UHF Laundry Tag withstands high-temperature, high-pressure wash cycles for outstanding performance in industrial laundry applications

SCHAUMBURG, IL, USA, June 28, 2016 /EINPresswire.com/ -- Today, RFID solutions provider [Hangzhou Century Link](#) announced the new TexSilicon UHF Laundry Tag, the latest addition to the CiLink series of [RFID Laundry tags](#). The TexSilicon tag is specifically designed to endure the rigors of high-pressure wash cycles, meeting the demands of the industrial laundry industry.

The [TexSilicon Fabric Laundry Tag CE36082](#) offers a durable design for cost-effective RFID tracking of individual laundry items to improve inventory management, reduce labor costs and optimize the lifecycle of textiles and garments. The soft, flexible and thin fabric tags offer reliable and durable performance to withstand high-temperature, high-pressure bulk laundry processes, and they can be applied quickly and easily by various methods, including hem, sew or heat-seal.

With the durable TexSilicon tag, laundry providers can gather valuable data about individual asset usage, enabling new business models and greater profitability. Real-time tag traceability improves efficiency, helping to reduce labor costs while improving customer satisfaction.

"The soft, flexible, yet durable TexSilicon Fabric Laundry Tag is ideally suited for tracking bed linens, towels, uniforms or other bulk laundry items," said Shine Shen, general business manager, Hangzhou Century Link. "With a long read range of up to three meters, bulk reading capability and durability, the TexSilicon RFID tag delivers outstanding performance to address key challenges facing industrial laundry service providers."

The new TexSilicon CE36082 fabric laundry tag measures just 67 mm x 30 mm x 2.6 mm (2.6" x 1.2" x 0.1"). The tag has an IP68 rating for certified protection from water and chemicals common to commercial laundry and dry cleaning processes, and is designed to withstand sterilizing heat and pressure.
