

IT Governance's popular Certified GDPR Foundation training course to be delivered in Copenhagen, Denmark

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, June 30, 2016 /EINPresswire.com/ -- [IT Governance](#), the leading provider of data protection and cyber security expertise, is excited to announce its partnership with [Copenhagen Compliance](#) to host a Certified General Data Protection Regulation (GDPR) Foundation training course in Copenhagen, Denmark.

IT Governance's [Certified EU General Data Protection Regulation \(GDPR\) training course](#) provides a comprehensive introduction to the GDPR. The course covers the essential GDPR background and terminology, key differences between the DPA and the GDPR, data subjects, access requests and rights, marketing requirements, data protection impact assessments (DPIA) and data audits, international data transfers, and the implementation path to GDPR compliance.

Alan Calder, the founder and executive chairman of IT Governance, says: "We're excited that through our partnership with Copenhagen Compliance we are able to deliver our Certified EU GDPR Training course to the Nordic region of the European Union. Organisations that collect and handle EU residents' data have less than two years to meet the requirements of the GDPR in order to avoid the risk of a data breach and the tough fines the GDPR imposes."

The course on 25 August 2016 will be delivered at DTU Lyngby in Copenhagen, Denmark, by Richard Campo, an experienced data protection consultant. The one-day training session is developed on the foundations of IT Governance's extensive data protection, cyber security and information security management system expertise.

The Certified EU GDPR Training course is aimed at individuals involved in data protection or information security, individuals with little experience but who wish to achieve a qualification in data protection, IT security officers, DPOs, CIOs/CTOs, internal audit managers and staff, IT directors, IT analysts, and anyone involved with data protection policies and procedures.

The course encourages professional development. Upon completing the course, delegates may sit a 60-minute multiple-choice exam, accredited by the International Board for IT Governance Qualifications (IBITGQ). Passing the examination proves that the participant has obtained a solid understanding of the Regulation and awards the EU GDPR Foundation (EU GDPR F) qualification.

For more information about the Certified EU GDPR Foundation training course delivered in Denmark, please visit Copenhagen Compliance's website, contact their team direct at info@copenhagencompliance.com or call +45 2121 0616.
