

Mansfield Plumbing Launches Powerful New Toilets

PERRYSVILLE, OHIO, USA, June 29, 2016 /EINPresswire.com/ -- [Mansfield Plumbing](#), an industry leader with Made in America toilets, has introduced the new DENALITM Power Flush toilet and the new PROTECTOR® No-Overflow Toilet. The company has also enhanced its SummitTM line of single flush toilets by adding an easy-to-clean PuraCleanTM glaze, improved styling including a decorative metal trip lever and an extended warranty.

"These three exciting enhancements to our toilet offerings give homeowners new options for adding powerful, efficient and stylish toilets to the home," says Adriana Miller, product manager for Mansfield Plumbing. "Whether a family with lots of teenagers or a household of Baby Boomers, these toilets easily handle the rigorous demands of any home."

DENALI Power Flush Toilet

For single flush confidence, Denali features superior flushing performance that's more than 20 percent greater than the highest MaP rating. Denali moves 1,200 grams of waste with 1.6 Gpf (grams per flush), as proven through independent testing. Made in the U.S.A., Denali comes as a SmartHeightTM easy-access ADA-compliant toilet with an elongated front and an easy-to-clean vibrant PuraClean glaze.

Denali maximizes energy by having water sit higher in its tank. During the flushing process, energy picks up as water moves through a three-inch flush valve to reach its highest velocity earlier in the flushing cycle. Dual side jets intensify the efficient and effective waste removal process. Additionally, Denali has been tested to one-and-a-half times the industry standard for carrying waste further down the drain line --- up to a 60-foot drain line carry distance.

"This stylish toilet fits with both contemporary and traditional decor," says Miller. "Because Denali performs 20 percent better than the highest MaP rating awarded, we know it will quickly become a favorite for plumbers and homeowners looking for the 'ultimate solution' to mass removal."

PROTECTOR No-Overflow Toilet

Denali Power Flush toilet from Mansfield Plumbing.

Featuring a unique concealed secondary drain that provides protection from messy overflow situations, the Protector is the solution to household headaches.

Made in the U.S.A., the Protector solves the problem of clogged toilets displacing overflowing water onto the floor by redirecting excess water into the concealed secondary drain. There are no unsightly holes and the overflow system is hidden within the bowl.

In addition to solving the "clogging overflow dilemma," the Protector stays clean longer than standard toilets. The highly-engineered PuraClean glaze on the toilet makes the bowl bacteria resistant and easier to clean.

Available as a SmartHeight toilet, the 1.6 Gpf Protector sits 16-1/2" tall and meets ADA standards, making it easy to sit and stand from this easy-access toilet. For powerful flush action, the toilet also features a three-inch flush valve design and can easily move 800 grams MaP.

"The design and engineering of the Protector delivers comfort, peace of mind and easy cleaning all in one toilet," says Miller. "By eliminating overflow concerns, we're producing a toilet that consumers will truly appreciate."

13 Enhanced Summit Toilets

The addition of the PuraClean glaze, improved styling (including a decorative metal trip lever) and an extended warranty are just a few of the top enhancements now available on all single flush Summit toilets.

"The improved Summit line features proven performance in a stylish toilet," says Miller. "Now we've taken a very good product and made it great with an extended five-year limited warranty on tank trim for single flush models, the highly-engineered PuraClean glaze and decorative metal trip lever."

Summit toilets all feature the Mansfield three-bolt tank-to-bowl SmartFasten™ system to prevent leaking and rocking, plus high performance MagnaFlush™ flushing technology. The toilets can flush 1,000 grams MaP and come in three low water consumption options: 1.6 Gpf, 1.28 Gpf and a dual flush of 1.1/1.6 Gpf.
