

# Anti3 Protect Series Launches New EPA Registered Equipment Spray

*Anti3 Protect Series Spray Helps Athletes Fight Fungal and Bacterial Infections*

JERICHO, NEW YORK, UNITED STATES, June 29, 2016

[/EINPresswire.com/](#) -- [Anti3 Protect Series Disinfectant Deodorizing Equipment Spray](#) (16 oz.) is an EPA-registered product that kills 99% of the germs on the surfaces it comes in contact with. It is specially designed to help athletes fight the harmful fungus and microorganisms that lurk in gyms, locker rooms and other places where active people congregate. Initially, these microorganisms may affect just individuals, but often they spread to all the athletes who have close contact with each other. "At the first sign of ringworm or other fungus, sports professionals should use our antimicrobial and antifungal product," says Chris Ferrara, founder and managing partner of the company that makes the equipment spray.

For student athletes and those at the professional level too, fungus and bacteria often thrive on gear and equipment. Though the list is limitless, the equipment includes helmets and other protective head gear, half mask respirators, full face breathing apparatus, gas masks, goggles, face shields, hearing protectors and ear muffs. To this list add gloves, elbow and shoulder pads, sneakers, cleats, boxing equipment, gymnastics equipment and yoga mats. That's because all these surfaces are often moist.

EPA Disinfectant Equipment Spray

In addition to ringworm, the equipment spray also combats athlete's foot and staph. The antibacterial properties of the product also provide a defense against [impetigo](#), which is caused by Streptococcus pyogenes and Staphylococcus aureus. Impetigo attacks the skin, particularly the hands, neck and face. It is usually transmitted in activities where there is skin-to-skin contact. A form of the infection attacks infants and young children.

Dean Spinato, co-founder and the other managing partner of the company, points out: "Our antimicrobial and antifungal spray is registered by the EPA. This means that the Environmental Protection Agency must be satisfied that our product is effective in disinfecting and sanitizing objects and surfaces. It also means that when it is used as directed, it will not harm the user. Our product is tough and effective and similar to what

hospitals use."

The company is dedicated to wiping out germs on athlete's equipment and clothing, and its motto is Cleanse, Defend, Protect. Its other products, which are also antibacterial and antifungal, are Hair and Body Wash, Foam Sanitizer Dry Wash and Laundry Detergent.
