

Panasoft Releases Images Generator 9.74

Because last improvements Images Generator provides the most of demands of ordinary users and provides additional capabilities for artists and designers.

SEVASTOPOL, CRIMEA, UKRAINE, June 29, 2016 /EINPresswire.com/ -- Panasoft announced the release of version 9.74 of its graphic application Images Generator. Images Generator is general-purpose program that combines properties of power graphic editors and properties of program of automatic designing. It can be used for following tasks:

Processing of photos. The application has a full set of the basic 2D graphic tools, many graphic filters and converters. It allows selecting parts of the image with resolution of one pixel. Powerful methods for removal of image defects are used.

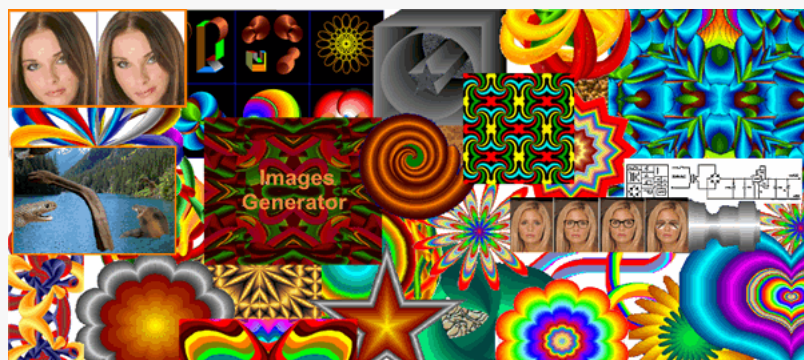

The program makes possible creation of fine images that can be used in the textile or paper industry.

The program is the convenient tool for creation of elements of Web graphic as icons, buttons, banners, frameworks and others.

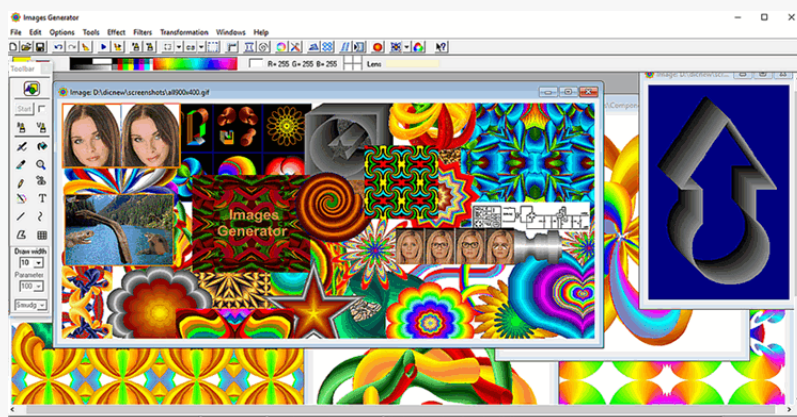

The program allows creation of three-dimensional images that can be used for engineering and mathematical modelling. Method of transformation of raster images provides various capabilities as creation images of faces from photos. Program allows obtaining of odd shaped lines. Such lines can be used in systems of automatic designing and plotting.

Compatibility with system AutoCAD is provided by using of dxf files.

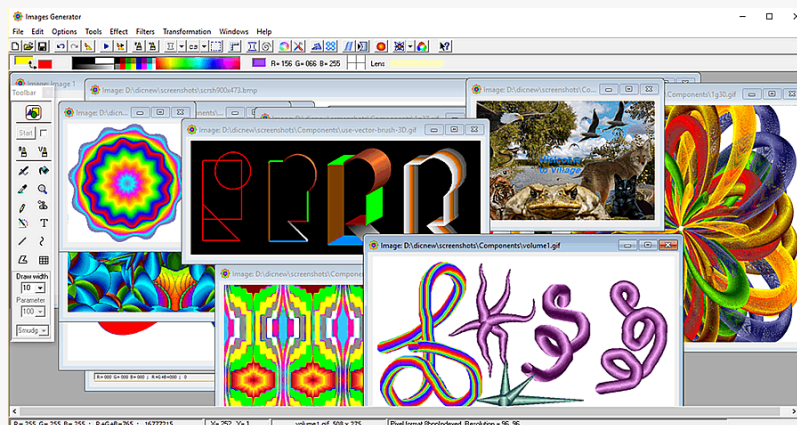

The program provides storage of images of objects such as electrical symbols, hieroglyphs, pictures of animals and pieces of clothing. Used convenient way of a combination of these images provides simplicity of creation of different pictures – diagrams, landscapes, ads, identikits, texts, congratulatory cards and others. Images Generator may be used for fitting of clothes.
