

# IT Governance launches updated PCI DSS Documentation Toolkit to help organisations comply with PCI DSS v3.2

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, July 1, 2016 /EINPresswire.com/ -- IT Governance, the leading cyber security services provider and PCI QSA company, is delighted to announce the launch of its [PCI DSS Documentation Toolkit](#), which has been updated to meet the requirements of PCI DSS v3.2.

The documentation toolkit is designed to provide organisations with expert PCI QSA guidance to reduce the risk of error and accelerate PCI DSS compliance. The toolkit helps payment card-accepting organisations ('merchants') ensure their documentation complies with the latest version of the PCI DSS, v3.2.

Alan Calder, founder and chief executive officer of IT Governance, says: "Organisations are required to declare the scope of their PCI DSS environment and ensure PCI DSS compliance by adequately testing the security of all in-scope systems. This expert-developed PCI DSS documentation toolkit allows organisations to save time and avoid mistakes in their compliance project, while using in-house resources and skills."

The PCI DSS Documentation toolkit comprises a host of documents and tools, including a Documentation Analysis Tool to help organisations ensure all required documentation is in place, a Gap Analysis tool to track progress towards achieving compliance, guidance on scoping encryption key management, and two [PCI DSS Staff Awareness e-learning](#) licences to increase employees' awareness of PCI DSS requirements.

In addition, the toolkit contains a PCI DSS v3.2 and ISO 27001:2013 Mapping Tool, which provides all the technical information you need to integrate the compliance project with an ISO 27001 information security management system (ISMS).

Available for immediate download, this toolkit is suitable for organisations of all sizes, types and locations. The toolkit also provides flexibility in terms of styling, formatting and branding, so organisations can quickly and easily embed documentation.

IT Governance is an authorised PCI Qualified Security Assessor (QSA) and supports services providers, merchants and organisations that accept, store and transmit or process cardholder data with a full range of PCI compliance and assessment products and services.

To find out more about IT Governance's PCI DSS Documentation toolkit v3.2, visit the [website](#), email [servicecentre@itgovernance.co.uk](mailto:servicecentre@itgovernance.co.uk) or contact the team directly on +44 (0)845 070 1750.

## NOTES TO EDITORS

IT Governance Ltd is the single-source provider of books, tools, training and consultancy for IT governance, risk management and compliance. It is a leading authority on data security and IT governance for business and the public sector. IT Governance is 'non-geek', approaching IT issues from a non-technology background and talking to management in its own language. Its customer base spans Europe, the Americas, the Middle East and Asia. More information is available at [www.itgovernance.co.uk](http://www.itgovernance.co.uk).
