

IT Governance launches post-Brexit offer to encourage vigilance in data protection and cyber security

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, July 1, 2016 /EINPresswire.com/ -- IT Governance, the global provider of cyber security, IT governance and information security expertise, has launched a range of [special discount offers](#) on selected cyber security and data protection products and services to help organisations deal with the uncertainty created by the Brexit referendum result.

Alan Calder, the founder and executive chairman of IT Governance, says: "All industries face months, if not years, of uncertainty following the Brexit vote. But there's one thing we can be certain of: cyber crime will continue to increase in scale and severity. In these turbulent times, all organisations need to do everything they can to survive. That's why it's essential to continue investing in best-practice cyber defences to combat the growing cyber threat."

In these uncertain times, organisations are encouraged to take a risk-based approach to data security and cyber crime.

To support organisations during these turbulent times, IT Governance has reduced prices on its flagship ISO 27001 documentation toolkits, its range of security staff awareness e-learning courses and its popular ISO 27005 Certified ISMS Risk Management training course.

The offers are aimed at enabling organisations to take the necessary measures to avoid cyber attacks and data breaches stemming from opportunistic cyber criminals.

To find out more about the [post-Brexit offers](#) and how IT Governance can help you build a robust cyber security posture in these uncertain times, please visit our [website](#), email servicecentre@itgovernance.co.uk or call +44 (0)845 070 1750.
