

# Maritime Information Industry the Technology Market Grow at CAGR 18.45% analysis of 2016 and Forecasts to 2020

*Latest niche market research study on "Global Maritime Information Market 2016-2020" published at [wiseguyreports.com](http://wiseguyreports.com)*

PUNE, INDIA, July 6, 2016 /EINPresswire.com/ -- Analysts forecast the Global [Maritime Information](#) Market to grow at a CAGR of 9.39% during the period 2016-2020.

## Summary

### Maritime Information Industry

The global maritime information market involves providing data, information, and applications required to understand events that are occurring in the maritime environment. It caters to the government and commercial sectors and analytics solution providers.

The users of maritime information gather data in order to have safety at sea, improve productivity, and ensure efficiency in marine operations. Maritime information ensures regulatory compliance, enhances situational awareness, delivers scientific and survey data, and monitors the environment for suspicious or illegal actions. The concerns regarding maritime border security, human trafficking, piracy, and environmental impacts (activities such as dumping or oil spills) are increasing the need for accurate on-time information to monitor maritime shipping activities worldwide.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Following companies as the key players in the global maritime information market: exactEarth, Inmarsat, Iridium Communications, ORBCOMM, Thales Group.

Other Prominent Vendors in the market are: Furuno Electric, Garmin International, INTELSAT, Kongsberg, L-3 Communications, Maritec, MacDonald, Dettwiler and Associates, New JRC, Raymarine, Raytheon, Rockwell Collins, Saab, Singtel, and Spire Global.

Commenting on the report, an analyst from team said: "A trend boosting market growth is the adoption of smart vessels in the maritime sector. Smart vessels have been progressively adopted by the maritime sector. These vessels contain sophisticated remote controlled equipment. Smart vessels increase maritime market revenue levels by delivering high operational efficiency through a remote control room that has access to maritime support services (MSS) and thus, it helps reduce the number of on-board crew members."

According to the report, a key growth driver is the growing demand for M2M communications. The global M2M services revenues are estimated to reach around \$70 billion by 2020. Almost all businesses are focusing mainly on the latest M2M systems that enhance operational effectiveness and efficiency. Incorporating M2M systems into business operations would help achieve real-time monitoring of remote vessels

Points from Table of content:

PART 01: Executive summary

- Highlights

PART 02: Scope of the report

- Market overview
- Top vendor offerings

PART 03: Market research methodology

- Research methodology
- Economic indicators

PART 04: Introduction

- Key market highlights

PART 05: Market landscape

- Market overview
- Market size and forecast
- Five forces analysis

PART 06: Market segmentation by application

- Global maritime information market by application
- AIS

- Vessel tracking (except AIS)
- Maritime information provision
- Maritime information analytics

PART 07: Market segmentation by end-user
