Architectural Rendering Software Industry Global Analysis by Region, Consumption, Competition and Technology

Latest niche market research study on "Global Architectural Rendering Software Market 2016-2020" published at wiseguyreports.com

PUNE, INDIA, July 6, 2016 /EINPresswire.com/ -- Analysts forecast the Global <u>Architectural Rendering Software</u> Market to grow at a CAGR of 29.37% during the period 2016-2020.

Summary

Architectural Rendering Software Industry

Rendering is the graphical process of creating a visual scene through computer-generated light waves. It creates the visualization of 3D objects based on the strength of light waves or particles that are created by the rendering software itself. Virtualization software is used to develop a real animation world around 3D objects that are created by the rendering software. Animation developers use the rendering software to create a non-realistic animation environment, and they use the virtualization software to make it immersive and realistic. A rendering software that is specifically designed for construction and architectural purposes is called architectural rendering software. Architectural rendering software is used to create a preview of a building before it is constructed.

Covered in this report
The report covers the present scenario and the growth prospects of the global architectural rendering software market for 2016-2020. To calculate the market size, the report considers the revenue generated from periodic licenses or subscriptions is earned from the fee charged to keep the license active.
The market is divided into the following segments based on geography:
• Americas
• APAC
• EMEA

Following companies as the key players in the global architectural rendering software market: Autodesk, Maxon Computer, Luxion, Lumion, Next Limit Technologies, Luxology Visionmongers, OTOY, and Chaos

Other Prominent Vendors in the market are: Blender, Daz Studio, Lightwave 3D, Mental Ray, RenderMan, Rhinoceros, SketchUp, Thea Render, and ZBrush

Commenting on the report, an analyst from team said: "Growing demand for non-photorealistic rendering"

According to the report, increased use of architectural rendering software in Middle East and emerging Asian countries

Some points from Table of content:

PART 01: Executive summary
• Highlights
PART 02: Scope of the report
• Market overview
• Top-vendor offerings
PART 03: Market research methodology
• Research methodology
• Economic indicators
PART 04: Introduction
• Key market highlights
• Market overview
• Global architectural rendering software market
PART 05: Geographical segmentation
• Global architectural rendering software market by geography
PART 06: Market attractiveness
• Global architectural rendering software market in Americas
• Global architectural rendering software market in EMEA
• Global architectural rendering software market in APAC
PART 07: Segmentation by end-user
• Global architectural rendering software market in non-residential building segment
• Global architectural rendering software market in residential building segment
PART 08: Buying criteria
• Buying criteria for architectural rendering software
PART 09: Market drivers
• Increased use of architectural rendering software in Middle East and emerging Asian countries

• Need for efficient product development cycle
• Need to improve construction quality
PART 10: Impact of drivers
PART 11: Market Challenges
