

E Cigarettes & Vapourizer Market to Reach \$28.57 billion with 21.1% CAGR to 2022

E Cigarettes & Vapourizer Market 2016 Global Trends, Market Share, Industry Size, Growth, Opportunities, and Market Forecast to 2020

PUNE, INDIA, July 7, 2016 /EINPresswire.com/ -- According to researcher, the Global E-Cigarettes & Vapourizer Market accounted for \$7.47 billion in 2015 and is anticipated to reach \$28.57 billion by 2022 growing at a CAGR of 21.1% from 2015 to 2022. Growing demand for distribution channels of e-cigarettes and accessories is the primary factor favouring the market growth. Furthermore, increasing number of brands, innovative product launches and product customizations are some of the drivers favouring the market growth. However, uncertain regulatory framework, increasing incidents of e-liquid poisoning and compatibility issues are some of the restraints hampering the market growth. New taxes on e-cigs in cities like Washington, D.C., are damping sales, as are new regulations, like measures passed this year in Indiana that require manufacturers to secure permits and list ingredients. The industry also is awaiting final rules from the Food and Drug Administration, which could require federal approval for nearly all flavored liquid nicotine juices and e-cig devices.
