

Higher Returns with Managed Risk

An article by Patrick Montesdeoca from Equity Management Academy

FORT LAUDERDALE, FLORIDA, UNITED STATES , July 7, 2016 /EINPresswire.com/ -- If you had invested \$10,000 on January 1, 2016 in an index fund that perfectly tracked the S&P 500, your investment account would have been worth \$10,269 on July 1. The same \$10,000 invested in a DJIA fund would be worth \$10,290. Neither return would move your dream of retirement much, if any closer, to reality, but at least they returned more than \$10,000 invested in a fund to track the NASDAQ, which would be worth only \$9,671.

During such times of minimal returns, the fund managed by [Equity Group Partners](#) is a beacon of light for investors searching for higher returns while keeping risk at manageable levels. The investor who put \$10,000 into the fund managed by Equity Group Partners would have an account as of July 1 worth \$13,200. A 32% return after six months is something on which to base your financial future.

Equity Group Partners, LLC, is a private investment partnership (hedge fund) managed by Equity Group Management, LLC which is offered solely to a limited number of sophisticated accredited investors seeking premium investment and trading returns.

The group's investment strategy is directed toward investors with long-term capital appreciation goals primarily using various compounding strategies of short term trading of stock, stock options, ETFs, and ETF options.

"We are extremely proud with our returns so far this year," said Patrick MontesDeOca, Chief Analyst and trader with the firm, which is based in Florida and Los Angeles. "We have developed a system and, by following it without emotion, we have achieved very satisfactory returns."
