

# Secured Socket Layer Certification Industry US Analysis 2016 - 2021

*Wiseguyreports.Com Adds "US Secured Socket Layer Certification Market" To Its Research Database.*

PUNE, INDIA, July 8, 2016 /EINPresswire.com/ -- Analysts forecast the secured socket layer (SSL) certification market in the US to grow at a CAGR of 24.33% during the period 2016-2020. SSL is a paradigm technology for the secure transmission of data between a client (web browser) and a server (web server).

- SSL creates an encrypted link between a web browser and a web server, which allows secure data transmission.
- It is a security protocol that uses algorithms to determine variables of the encryption for both the link and data that is being transmitted.
- It ensures the secure transmission of sensitive information such as credit or debit card numbers, login credentials, and confidential information.

The encryption process includes the use of a public key and a private key to encrypt the data, which is known as the SSL handshake process. The SSL handshake process securely exchanges data used by both the client and server. The server responds to the browser with a request to begin communication by using the master keys and parameters.

#### Other prominent vendors

- Namecheap
- Network Solutions
- Nexcess.Net
- SSL.com
- Starfield Technologies
- Verizon
- Volusion
- ZNetLive

#### Market driver

- Increasing internet penetration and adoption of cloud services
- For a full, detailed list, view our report

#### Market challenge

- Slow SSL response time
- For a full, detailed list, view our report

#### Market trend

- Increase in adoption of IoT
- For a full, detailed list, view our report

#### Key questions answered in this report

- What will the market size be in 2020 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?
