The American region generated the largest amount of demand for dry casks for spent nuclear fuel between 2010 and 2015. Demand is expected to further increase during the forecast period 2016 to 2020, as more reactors are expected to come online. The second-largest amount of demand for dry casks was registered in Europe, and the market in this region is expected to register substantial growth during the forecast period. Asia-Pacific has observed significant growth in its nuclear power-generating capacity since 2010 and has scope for the dry storage cask market in the forecast period.
