Electronic Paper is gaining visibility by industry experts to introduce an efficient display solution for their varied requirements. Physical paper is continuously being replaced by e-paper due to its flexibility and reusable nature. Future developments in the electronics paper technology are towards integrating color, animation and video features in the existing models to advance the user experience and Industry applications.

The Global E-Paper market is expected to grow from \$5.31 Billion in 2015 to \$11.35 Billion in 2020, at a CAGR of 16.41% during the period 2015 to 2020. Increasing demand for flexible paperless options and increasing drive towards green solutions globally are driving the demand for electronic paper market. E-paper enables a paperless option for various applications reducing the requirement of physical paper. Increasing Internet applications and usage of E-Book Reader globally, drives a great potential for electronic paper market. But, being in the initial stages the technology demands for lot of improvements catering to low refresh rate and lack of color and video options. Also, E-Paper is virtual in nature drives privacy and security concern restraining the market.
