

# Global Recycled Plastics Market Analysis and Forecasts to 2020

*Recycled Plastics Industry Global Analysis by Region, Consumption, Competition & Technology*

PUNE, INDIA, July 12, 2016 /EINPresswire.com/ -- Wise Guy reports: [Recycled Plastics](#) Market - Global Industry Analysis, Size, Share, Growth, Trends and Forecast 2016 – 2021. Analysts forecast the global recycled plastics market to grow at a CAGR of 4.31% during the period 2016-2020. Plastic recycling decreases the quantity of wastes that are being dumped into landfills and aids in transforming the wastes into lower or same grade plastic materials. These products are used across different sectors.

A large proportion of the plastic that is procured for recycling is not suitable for recycling as most plastics used are semi-porous and absorb molecules of the stored material. The removal of these residues is tedious and additional treatments for the same can potentially alter the properties of the recycled plastics. Most recycled plastics are used to make lower grade products. These are hydrolyzed to a monomeric form and then purified and re-polymerized into food grade plastic.
