

A Future without Flossing

Say Goodbye to Cavities, Bad Breath and Expensive Dental Bills.

MONTREAL, QUEBEC, CANADA, July 11, 2016 /EINPresswire.com/ -- Are you tired of cavities, bad breath, sore and bleeding gums and huge dental bills? Do you hate to floss and are embarrassed having to lie to your dentist and hygienist about the number of times you floss each week? Are you tired of simply having bad breath?

Dr. Allan Coopersmith, BSc DDS FAGD FADI FICD FCARDP FACD FIADFE, and dental hygienist Nathalie Fiset, RNH, have invented a new and innovative dental product, the [PerioTwist™](#), which launches on [Kickstarter](#) in July for worldwide distribution this September.

The PerioTwist™ is a patented, inter-

dental cleaner, which acts like a turbo toothpick that is easier, faster and more efficient than any floss, pick or brush you will ever use. Flossing is often difficult, time-consuming and occasionally painful. Alternatives like wires and brushes break, scratch and damage your teeth, and often result in expensive dental work. The PerioTwist™ is the only device that can be “twisted” and pushed/pulled for maximum efficacy.

“

We as health professionals were as tired trying to convince our patients to floss, as our patients were to listening about it. The truth is that dental floss is not the easiest to use.

*Dr. Allan Coopersmith, BSc
DDS FAGD FADI FICD
FCARDP FACD FIADFE*

PerioTwist™ is super simple to use. Just insert it between your teeth and twist or push/pull it and let the magic of its design take care of the rest. Alternatively, you could also dip it into any paste (like toothpaste, liquid or gel for addition benefits) and twist it clockwise as you withdraw it leaving toothpaste or other medicaments to keep on treating. PerioTwist™ will treat and prevent tooth decay, gum disease and bad breath and even systemic illnesses such as heart attacks and strokes.

PerioTwist's™ one size fits all design makes it easy to use no matter how wide or tight the space between the teeth. As a result PerioTwist™ is ideal for people with braces, bridges and implants.

Each PerioTwist™ is reusable and can last for weeks, which makes it economically friendly. It also

The advertisement graphic features a dark blue background. At the top, it reads "THE FUTURE OF ORAL HEALTH CARE" in white. Below this is the "PerioTwist™" logo in white and blue, with the tagline "The Future Of Oral Health Care" in smaller white text. The central part of the graphic shows a comparison of five dental cleaning methods: Toothpick, Wire Brush, Dental Floss, PerioTwist, and PerioTwist with Medicament. Each method is illustrated with a cross-section of teeth. The PerioTwist device is shown as a blue, twisted, spiral-shaped tool. Below the illustrations, the text "PerioTwist - A future without Flossing" is written in white. At the bottom, the "PerioTwist™" logo is repeated in large, bold, blue letters, with the tagline "The Future Of Oral Health Care" and "PerioTwist Logo" below it.

has 100% natural essential oil and antibacterial (Guard-In) which keeps it germ free, and has a cover which fits right on the handle which makes it easy to hold and use. Best part is its small enough to carry in your pocket or wallet without getting damaged for use on the go!

Latest research shows that many patients actually lie to their dentist or hygienist that they floss. That is why the founders spent the last 12 years researching and developing the PerioTwist™.

“We as health professionals were as tired trying to convince our patients to floss, as our patients were to listening about it.” Said Dr. Coopersmith and Nathalie Fiset. “The truth is that dental floss is not the easiest to use. You need two clean hands, manual dexterity and usually a mirror and sink. Not to mention that it often tears or shreds and even turn your fingers blue!”

The PerioTwist™ was invented, developed, and manufactured in Canada.

Watch out for the [Kickstarter campaign starting](#) in June/16 to be the first to start preventing tooth decay, gum disease, bad breath, heart attacks, strokes and to start saving time and money at the dental office.
