

# 451 Research Group to speak at Geist's DCIM Symposium

LINCOLN, NEBRASKA, UNITED STATES, July 14, 2016

[/EINPresswire.com/](http://EINPresswire.com/) -- Geist's Hitchhikers Guide to DCIM: 2016 Symposium to be held at the end of August in Fort Collins, CO., is close to sell-out. There is a limited amount of all-access passes remaining that include the full three-day experience.

The symposium will feature keynote speaker, Rhonda Ascierio, of 451 Research Group, plus a number of speakers presenting current DCIM trends, real-life applications and new feature sets. Two training days, included in the all-access pass, are intended for in-depth system training on Geist DCIM products and will include one-on-one time with system engineers, product management sessions, and hands-on technical training.

Geist recognizes that customization is key to successful DCIM. The symposium design will allow attendees to shape their

agenda based on their interests during various break out sessions. Attendees will take away an understanding of how to drive a more efficient data center infrastructure management system based on their unique needs.

The graphic features the Geist logo at the top, consisting of a yellow hexagonal shape with a white outline and the word "GEIST" in bold black letters below it. Underneath the logo is the tagline "Future Thinking • Solutions Today". The main body of the graphic is a collage of green and grey geometric shapes. On the left, there is a small globe icon next to the text "GEIST DCIM". On the right, there is a large gear icon with a thumbs-up gesture inside it, set against a background of a mountain range. At the bottom, the text "DCIM Symposium set for August in Fort Collins, CO" is displayed.
