About the Remote Health Delivery Market in India

Remote health delivery, or telemedicine, is defined as the remote delivery of healthcare services through ICT. It is an effective combination of ICT and medical science that helps address the challenges faced by the Indian healthcare delivery system. Remote health delivery shifts the focus of a healthcare system from curing diseases in hospitals to a system that provides healthcare delivery whenever and wherever the need arises. A widespread adoption of remote health delivery systems will transform the role of hospitals in providing healthcare services. It will improve service quality, streamline processes, and increase the overall efficiency of hospitals. Research analysts forecast the remote health delivery market in India to grow at a CAGR of 20.18% during the period 2016-2020.
