

Protection from the Global Stock Market Collapse

Harald Seiz: "Protect Yourself With Gold"

STUTTGART, BADEN WÜRTTEMBERG, GERMANY, July 14, 2016 /EINPresswire.com/ -- Protection from the Global [Stock](#) Market Collapse

Since 1982, there have been recessions approximately every 8 years. Seemingly, a burst bubble caused each recession. Each recession has been more severe than the previous with longer and more painful recoveries. One thing has kept its value through the upheavals, and that is [gold](#). Looking at history, it seems like we are ripe for another severe recession, more severe than the 2008 global meltdown. This coming collapse could bring even more turmoil to the markets. We all know what happened in 2008 with the global stock market crash. It's inevitable for that to happen again very soon.

Protect Yourself With Gold

A good way to protect yourself is with gold. While global stock markets roil in turmoil, gold steadily gains ground. It's considered to be a safe haven in troubling times. Gold has shown time and time again that it can keep its value through troubled times. It has shown time and time again that it can provide more stability and better returns than the global stock markets.

Is Gold Out of Reach?

Unfortunately, many people think the price of gold is so high that it's seemingly out of their financial reach. I used to think like this. I used to worry about how I could protect me and my family assets, but buying more than a few gold coins was out of my reach. I thought about silver, but it doesn't have the quite the same safe haven qualities as gold does.

I began researching about ways that I could protect my family with gold before the next global financial crisis hits. I knew that saving a little bit at a time would require me to keep a significant amount of assets in paper money, and that is what I really wanted to avoid. I was also concerned with transferring such large amounts of money to buy coins once I saved up enough.

Possible to Buy Small Amounts of Gold?

I realized that I needed to find a way to purchase small amounts of gold. I wanted to buy a little bit at a time from small orders. I wanted to be able to convert my savings directly into gold on a regular basis without too much holding of physical cash. This way I could benefit from gold's rising price. I just needed to find a way to make this happen.

The Karatbar Solution

This is about the time that I came across Karatbars. It's just what I was looking for. You can buy small amounts of gold. They sell in 1g, 2.5g and 5 g mini bars that are put in cards. These cards are not unlike the chipped credit cards that taking over. I could build my savings with safe gold that I owned and controlled. I could buy just a little bit at a time.

I was happy to see that I wasn't the only one who felt like I did. I discovered that the founder of Karatbars, Harald Seiz, had the same vision as I did. He formed Karatbars to provide an avenue for everyday people, like me, to invest and hold gold. His vision is help people like me protect my assets.

I'm really happy that I'm able to invest in gold at rate that my budget can handle. I feel comfortable knowing that I have a measure of protection against a coming global stock market crash. I'm thankful for Harald Seiz and Karatbars.
