

Global Security Testing Market 2016 Share, Trend, Segmentation and Forecast to 2020

Security Testing Market 2016 Global Trends, Market Share, Industry Size, Growth, Opportunities, and Market Forecast to 2020

PUNE, INDIA, July 14, 2016 /EINPresswire.com/ --

The increasing number of cyber security attacks and hacks into sensitive networks from applications is exposing the vulnerabilities and threats caused by applications which are not evident during their development and deployment. These hacks can cause severe disruptions to the business or compromise sensitive customer or internal information. This has caused governments across the world to introduce stringent regulations to ensure companies follow guidelines and ensure security of sensitive data.

Security Testing will ensure that the systems and applications on a network if it is secure or not. The evolution of Dynamic application security testing beyond the security testing of back-end web applications has opened up new avenues for the security testing market. They now have the capabilities to test next generation applications. The ability of some of the testing providers to enable interaction between their static and dynamic security testing techniques provides more detailed information which is quite useful in QA testing in order to provide more meaningful results to developers. The emergence of HTML5 which requires higher levels of maturity and adoption is driving innovation in DAST. The emergence of cloud computing along with the ability to offer Testing as a Service (TaaS) with flexibility to test sensitive applications on premises and outsourcing others has enabled firms across various sectors like BFSI, Government and Public Sector, Healthcare and Retail to include testing in their operations.
