This professional pack of water-soluble pencils comes in it's own carrying case. It contains a super range of 36 individual shades, a blending paint brush and sharpener. Unlike most other sets Colorfest have been smart to also include a pencil extender. An essential tool to extend the life of pencils when they get short.

Watercolor pencils are becoming very popular with those discovering the pleasures of adult coloring. This is because they are incredibly versatile. You can use them dry like regular colored pencils but then there is also what happens when you add water. Some people apply water to the pencil and others prefer to add it to the paper with a brush. It takes some practice but they can be used to produce some lovely watercolor effects.
