The early diners are offered free customization- Up To 20%

The market has evolved through three generations and is standing at the point of influx, wherein a plethora of companies are entering, thanks to the low entry barriers such as government policy and capital requirements. The global e-cigarette market is poised to grow nearly USD 25 billion by 2021, at an estimated CAGR over 25% from 2015 to 2025.

Alarming health issues caused due to tobacco is the main driver to promote growth in the market

Growing number of cancer patients due to excessive consumption of tobacco worldwide is one of the major reasons for the consumers to quit tobacco, However, several people find it difficult to get rid of the tobacco addiction and hence prefer e-cigarette over conventional cigarettes. Moreover, several govt initiatives to promote awareness about the health issues caused by tobacco consumption has increased number of people switching from conventional cigarettes to e-cigarettes over the past couple of years.
