

Virginia E-Learning Presents Step by Step video courses with professional online consultancy

SAN FRANCISCO, CALIFORNIA, UNITED STATES OF AMERICA, July 18, 2016 /EINPresswire.com/ -- [Virginia E-Learning](http://VirginiaE-Learning.com) Presents Step by Step video courses with professional online consultancy

Virginia E-Learning is an online training company with more than 10 years of experience working with professionals in the field of engineering, architecture and software development. Virginia E-Learning Presents Step by Step video courses with professional online consultancy Step by Step video courses.

Virginia E-Learning offers step by step video courses that in a comprehensive manner, will guide you through the interface of software such as SAP2000, Autodesk RSA, Advance Steel, Autodesk React Structures, Autodesk Revit, Microsoft Excel and many more.

Starting from absolute beginners they will guide you all the way up to an industry professional level, and into the development of complex projects, e.g. performing a Spectral Modal Analysis for a structure of 20 stores height and above. Virginia E-Learning Presents Step by Step video courses with professional online consultancy. As a plus each video is clearly subtitled; useful for those whose first language isn't English.

Moreover, each tutorial follows the

development of a complete project, so the user can learn the complete workflow of the software. And not just unconnected tools one after the other.

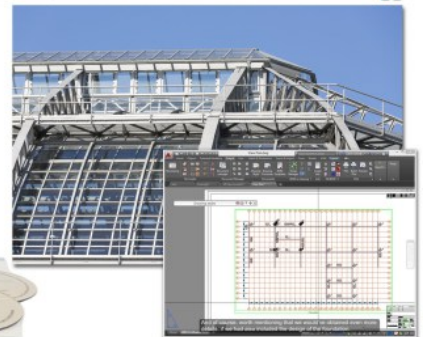

OUR AUTODESK ROBOT 2016 STEEL SERIES HAVE ARRIVED!

Virginia E-learning Autodesk Robot Tutorials

**AUTODESK®
ADVANCE STEEL 2016. II**

Virginia E-learning Autodesk Robot SAP Tutorials

This feature is of great help for those who wish to begin working with projects of their own, right away.

Professional Online Consultancy

Beyond drawing and design software, Virginia E-Learning takes on complex subjects such as Civil and Structural Engineering. With the unique feature of offering free Professional Online Consultancy to all of its customers.

This brings a whole new advantage to those seeking to improve their skills in a particular software and furthermore, to quickly apply it to their particular projects and industry needs.

Virginia E-Learning customers totally trust this feature. And rightfully so! From the design of anti-seismic steel structures, to foundations for deep excavations, the array of criteria and specifics that can arise in a given project are quite broad.

Whether you work with SAP2000 or Autodesk RSA, the particular criteria for each project, according to your own country and region, should always be applied by a skillful Civil or Structural Engineer who fully understand the ongoing process of designing and analyzing a structure.

They will help you not only to solve an issue with a given tool or option in the software, they will advise you on how to use the software for addressing particular design and engineering issues.

Most companies don't dare to address training solution for this kind of programs given their level of complexity, this makes Virginia E-Learning one of the best options for professionals looking for this kind of courses
