Global Desktop Virtualization Market 2016 Share, Trend, Segmentation and Forecast to 2022

Desktop Virtualization Market to Grow at a 11.58% CAGR Forecast to 2022

PUNE, INDIA, July 18, 2016 /EINPresswire.com/ -- Tight regulations and data security issues are some of the challenges faced by manufacturing enterprises. In addition, floor operators want easier access to plant floor operations, control systems and production data. To meet these challenges, manufacturing enterprises are deploying desktop virtualization solutions which helps them in hardware consolidation, high availability of resources and more. The most important benefit of desktop virtualization is hardware independence. The market for desktop virtualization for manufacturing industry is expected to grow at a CAGR of 11.58% over 2014-2019.

Complete report details @ https://www.wiseguyreports.com/reports/474205-desktop-virtualization-in-manufacturing-virtual-desktop-trends-and-forecasts-2014-2019

Reasons to buy this report
1)Report gives complete market insights, the driving forces of the market, the challenges market faces, technologies and their applications
2) A complete market breakdown has been done by different geographies along with the country level segmentation to give a detailed picture of the market.
3) The report also gives information on major vendors and their products, their existing share in the market, strategies they adopt along with the financials, recent developments and profile of these vendors.
