

Facts About Exhilway Regulation A+ IPO

Exhilway will focus on the emerging economies, assist growing companies to raise funds and get listed. This will result in value creation for the investors.

BEVERLY HILLS, CALIFORNIA, UNITED STATES, July 19, 2016 /EINPresswire.com/ -- Exhilway is planning a Regulation A+ IPO and will soon begin with the "testing the waters" phase. The company is planning to raise US \$10 million at an expected valuation of US \$557 million.

Here are the top 5 facts about the Exhilway Regulation A+ IPO:

Exhilway Emerging Markets Focus

Exhilway is planning to position itself as one of the leading business incubator for the startup, launch, high growth and market leadership stage companies. Exhilway will focus primarily on the emerging economies and plans to take the best companies public on the US / UK stock markets via reverse merger or the fresh listing.

Exhilway is not a private equity fund, hedge fund or an investment adviser or manager and may carry no commercial risk. Exhilway will act as an aggregator of law firms and investors and will directly suggest investment opportunities. The partners will then assist the suggested companies in raising funds from the investors or getting listed. Exhilway will receive both cash and stock reward / revenue in lieu of its services (stock reward will be higher). The operating margins are expected to be in between 50%-65%.

Exhilway will partner with the existing investment / crowdfunding platforms to bring business from the emerging parts of the world. This will help their investors to diversify their portfolios.

Exhilway will partner investment banks in the emerging markets who will conduct on the ground due diligence of the investment opportunities. The cost of due diligence will be borne by the client which eliminates the risk of losing capital. This will result in increased transparency and enhanced investor confidence for the emerging markets.

Exhilway will not be a competition to the existing investment / crowdfunding platforms but will act as their affiliate in the emerging economies of the world.

Upside:

Higher operating margins.
Negligible commercial risk.

On the ground presence in the emerging economies.

Need based product and may be preferred by the investor class.

Majority of turnover will be in the form of stock compensation which can be liquidated once the company is listed.

Downside:

Emerging economies have their own economy risks. The emerging economies may become highly unstable in case the global economy comes under pressure.

Better performance of the developed economies may eliminate the need of the investment opportunities from the emerging economies.
