Analysts forecast the Global Keyboard Market to grow at a CAGR of 4.77% during the period 2016-2020.

Summary

A PC peripheral is a device that is connected externally to a PC to enhance its capabilities. Keyboards, mice, printers, scanners, routers, etc. are referred to as PC peripherals. A keyboard is an input device for a PC. The global keyboard market is experiencing a shift in the revenue contribution from developed markets to developing markets. Although the developed markets held the majority of the market share in 2015, the market share contribution from developing countries will overtake their market share in the future.

The growth of the global keyboard market is driven by a number of factors. One of the major drivers is the increasing number of PC gamers. There are over one billion PC gamers around the world who use gaming keyboards. With the increasing number of PC gamers, the sales of PC gaming keyboards will increase further. Countries such as China and India are showing significant growth in the online gaming segment.
