

Radcon.io Enters into Collaboration with Canada's Open Sky Incubator to Nurture IoT Startups

The renowned product design firm will offer startups its expertise in hardware design in the IoT space along with investment opportunities.

HONG KONG, HONG KONG, July 19, 2016 /EINPresswire.com/ -- Radcon.io, a leading [hardware design](#) firm specializing in connected technology (IoT) has entered into a partnership with Canada based Open Sky Incubator. Together the two will work to accelerate innovation, open up synergies for expansion and outreach to nurture the startup community in this space.

As part of the collaboration, Radcon.io will offer its expertise in technical evaluation, design, engineering, project management and go-to-market services. It will also provide investment opportunities in the IoT space for promising startups.

Based out of Hong Kong, Radcon.io designs and develops [IoT hardware products](#) with a full suite of services that

transform concepts into real-world products. Open Sky Incubator is a privately funded incubator operating in the Kitchener-Waterloo region, devoted to help tech professionals with office suites and co-working space, as well as providing workshops, events and collaboration opportunities with top-tier companies.

"It's an exciting time to be part of the IoT industry, and we are delighted to offer our expertise in hardware design to support innovators. We are looking forward to collaborating with Open Sky to help the startup community accelerate innovation and create disruptive technologies together," said Conrad Lee, CEO of Radcon.io.

"It is critical we surround local entrepreneurs with skilled talent and resources. Radcon's team and experience in design, engineering, and manufacturing will be valuable for companies looking to bring their products to market." said Emile McLean, Founder of Open Sky Incubator.
